

3C Report Generator

Find patterns, analyse trends and present figures graphically.

Use 3C Report Generator to manipulate and analyze data quickly and build on-the-fly reports, make critical business decisions in real-time without any or little support from the IT department for report creation.

Always one step ahead?

3C Report Generator gives you a complete overview of your business information, ensuring that you are constantly updated with the information that puts you in the driving seat and in full control. Having the right information means that you are always one step ahead, and in a position to make the necessary changes.

Faster, simpler and more attractive

A finance and information system contains a large quantity of information which can be generated into different reports. Used in combination with Microsoft Excel, 3C Report Generator retrieves this information and enables you to produce, compile and present the information in a faster, simpler and more attractive way.

3C Report Generator

enables you to view your business information from different perspectives and with different levels of detail. You can also set up comparisons such as a graphical presentation of 'which salesperson sold which products in which projects in which months or compare accounting figures such as actual expense and income by project or department'.

Self generated documentation

will generate ready-to-use Microsoft Excel Pivot tables which can be analysed and processed. Pivot tables are a standard function in Microsoft Excel and can be used to automatically organise information from our systems. This enables you to use the information to set up comparisons between the different information carriers, find patterns, analyse trends and present figures graphically
