Risk Predictor: the ideal solution for enterprise risk management

- **Easy** - an automated solution that is easily customized and implemented. Get the maximum risk management benefit with a minimum of effort.
- **Accountable** - company-wide accountability ensures reliability and involvement.
- **Scalable** - easily supports large, distributed user populations worldwide.
- **Modular** - you can address pressing issues now and, when you're ready, activate other modules for additional functionality.
- **Flexible** - you can easily customize the software now or in the future, as needs evolve.
- **Valuable** - beyond immediately addressing compliance requirements, Risk Predictor is a primary platform for enterprise risk management.
- **Ready** - you can begin as soon as you're ready!

Risk Predictor supports operational risk management by:

- Identifying and scoring enterprise-wide risks based on significance and likelihood
- Identifying controls and rating relationships to each risk
- Once management has set targeted risk standards. Risk Predictor will:
 - Measure variance versus target risks and prioritize based on criticality
 - Identify issues and track action plans and owners
 - Monitor progress against goal
- Customizing all views and reports for internal use and reporting
- Integrating all stored data centrally and integrating it with 3C Reporter, therefore allowing users to build powerful reports, charts and graphs

3C Risk Predictor for the IT Professional

Security

3C Risk Predictor allows for very granular roles and security rights assignments. Multiple security levels can be defined.

Getting started

It is very easy to install, configure, and run 3C Risk Predictor with its Microsoft-based technology. In fact, you might never hear a cry for help from your departments again!

Compatibility and Connectivity

3C Risk Predictor can be easily integrated into your operations information system. The Associated Systems area allows a seamless bi-directional connection with other systems you are using.

Data Import and Export

3C Risk Predictor easily integrates with Microsoft Excel and other programs for ease in data transfer. 3C Risk Predictor allows import and export to any delimited text file. Data import utility makes importing your employee data into 3C Risk Predictor simple. Data import supports Microsoft Excel, dbase, or any other program that can create delimited text files.

Customization

An unlimited number of custom tabs and fields can be easily created; you can also import custom templates. All custom fields can be included in 3C Risk Predictor reports.

Complete Client Support

Friendly, easy, and quick, our expert client support team will answer all your queries by phone, email, or live-web. Support and maintenance delivers regular 3C Risk Predictor enhancements, updates, and software versions.

Installation, upgrades, and ongoing maintenance are hassle-free and should not require any of your internal IT resources.

Robust Microsoft Platform

3C Risk Predictor is built on the latest client-server Microsoft technology and will smoothly connect to other components of your system:

3C Risk Predictor runs on MSDE or MS SQL Server. Contact us for further system requirements.
